TELEPRESENCE

FAQ's

How long does the installation of this system take?

One working day

What sort of visual quality can I expect?

This depends on the network option you choose. The three options we have selected offer the best possible quality depending on your budget.

Is the system easy to operate?

The system is very intuitive - anyone who has used a smart phone will

be able to use it. If you ever need assistance our help desk is only 3 rings away

What are the benefits of the system?

This bundle leverages the Omega video conferencing core infrastructure. Only large corporates with R2m+ systems normally have this at their disposal. Omega has now bundled this infrastructure with a standard enterprise quality video conferencing unit.

Can I send other types of media through my laptop whilst on a TelePresence call?

Yes. One of the benefits of using our solution is the ease with which you can share content.
